

Digital Workplace Transformation

Redefining the way we work through technology-driven workplaces

Workplace Redefined

Comspec defines **Digital Workplace Transformation (DWT)** as a process of shifting from traditional workplace to a digital set-up through thoughtful planning and designing of an 'existing' or 'new' space with the reinforcement of digital innovations, technologies and tailor-fitted solutions that will enable cohesion, efficiency and productivity of a company geared towards achieving its goals.

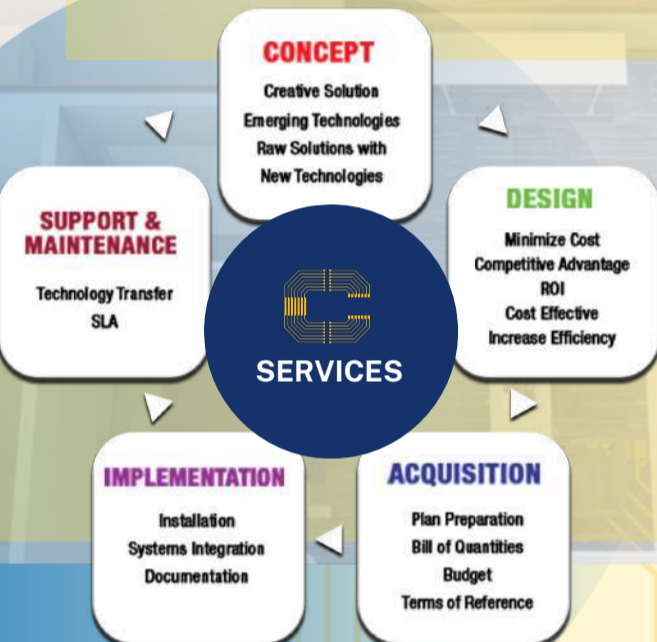

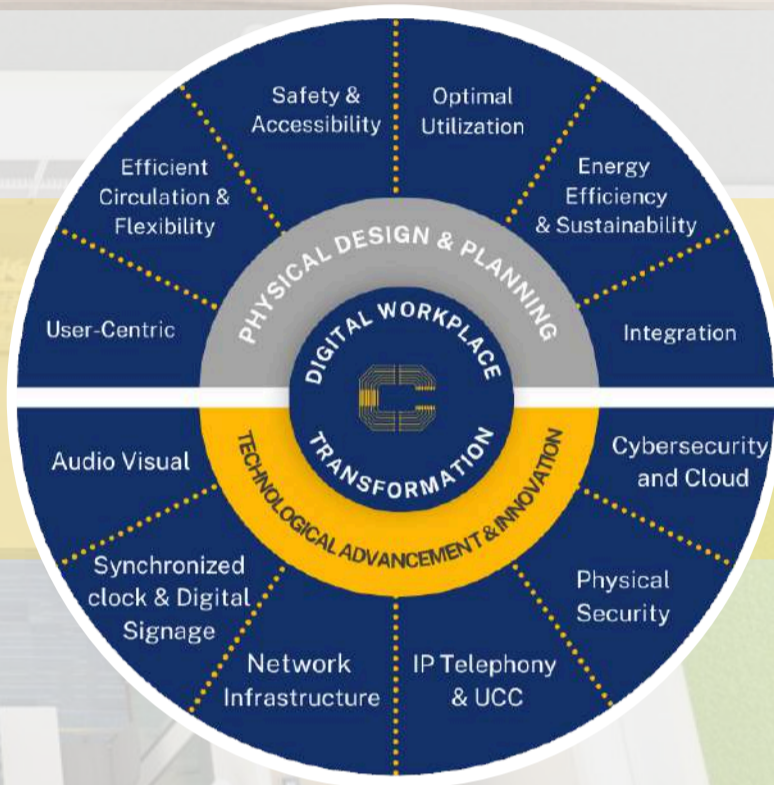

Key Elements

Physical Design and Planning

Excellent space planning for an efficient and aesthetically pleasing layout and optimization of the workspace.

Technological Advancement and Innovation

Combining an array of solutions, tailor-fit to an organization's unique needs, to achieve its overall goals.

As a seasoned systems integrator, Comspec understands clients' different needs. That's why, we offer a holistic approach to our support and services from conceptualization, designing, acquisition, implementation, as well as support and maintenance, to ensure that **we will be there with you every step of the way.**

Comspec Solutions

Audio Visual

Specialized and reliable quality audio-visual systems, providing optimal experience face-to-face or virtually.

Network Infrastructure

Be "future-ready" with high-quality, resilient, reliable, and secure connectivity to support changing demands in a digital workplace.

Physical Security

Achieving safe and secure organizations with adoption of analytics and AI for an improved video surveillance system.

Master Clock & Digital Signage

Accurate and synced time displayed across devices and high quality digital signages for effective and real-time mass notification.

IP-Telephony & UCC

Extensive and secured features of IP-PABX for advanced communication via voice, chat, or video across devices.

Cybersecurity and Cloud

Driving productivity, modernizing business processes, and reinforcing controls over cyber threats and attacks.

Let us help you assess your readiness and current pace in your journey towards your organization's digital workplace transformation. Call us or visit Technology Experience Center (TEC) to experience first hand the future of digital transformation!
